

KONSTANTINOS TSIAKAS

Senior Platform Engineer | Cloud Infrastructure Architect

Email: const.tsiakas@gmail.com | Website: k-tsiakas.github.io | Athens, Greece

PROFESSIONAL SUMMARY

Strategic Senior Platform Engineer with 8+ years of experience in high-performance FinTech, AI, and IoT environments. Expert in architecting zero-trust, ISO-compliant AWS/GCP ecosystems and multi-cloud cost optimization. Proven track record in building automated, scalable platforms that reduce deployment friction and enhance operational reliability for mission-critical infrastructure.

CORE CERTIFICATIONS

AWS Certified Solutions Architect – Professional (SAP) | **Certified Kubernetes Administrator (CKA)**

PROFESSIONAL EXPERIENCE

Senior Platform Engineer | *Voda.ai (Asset Management)*

Jun 2025 – Present

- Architected ISO-compliant AWS environments using modular Terraform, significantly reducing infrastructure deployment time for complex multi-account ecosystems.
- Automated high-frequency CI/CD workflows via GitHub Actions and Amazon ECR, improving release cycles and enabling robust cross-VPC observability.
- Integrated federated SSO with external Identity Providers (IdPs) to harden organizational security and streamline access management across the enterprise.

Cloud Infrastructure Consultant | *Synthesa.ai (AI-based Evidence Synthesis)*

Aug 2025 – Present

- Designed comprehensive GCP ecosystems to support large-scale AI data engineering pipelines, ensuring seamless integration between infrastructure and data layers.
- Hardened platform security by implementing Identity-Aware Proxy (IAP) and automated governance frameworks using Terraform to ensure strict data privacy.

Infrastructure Lead & Senior DevOps | *EquinoxAI B.V. (Trading Firm)*

Nov 2021 – May 2025

- **Latency Optimization:** Refactored core trading infrastructure to achieve **30% gains in execution latency**, directly improving the performance of high-frequency algorithmic strategies.
- **Multi-Cloud Efficiency:** Optimized global cloud spend by **25%** through strategic resource balancing across AWS, Hetzner, and Backblaze.
- **High-Performance Observability:** Implemented centralized alerting and monitoring using Clickhouse, ELK, and Grafana to ensure 99.9% uptime for mission-critical trading systems.

DevOps Engineer | *Hellenic Army IT Support Center (KEPYES)*

Jan 2021 – May 2021

- Provided R&D for new technologies and automations; presented weekly scalability optimization strategies to senior leadership.

DevOps Engineer | *Deepsea Technologies (Shipping Industry)*

Jan 2019 – Sep 2020

- **Scale:** Migrated local ML scripts to cloud microservices, enabling model production for **100+ ships weekly**.
- **Impact:** Engineered monitoring systems for fuel cost reduction and engine health, contributing to measurable operational expense reductions for maritime clients.
- Managed VPN roles and complex authentication flows to secure ship-to-shore communications.

- Developed IoT and 5G streaming applications using AngularJS, Docker, Kubernetes, and InfluxDB for large-scale European research projects.

| TECHNICAL SKILLS

Cloud & Infrastructure	AWS (SAP), GCP, Hetzner, Docker, Kubernetes (CKA), Terraform, CloudFormation
CI/CD & Automation	GitHub Actions, GitLabCI, Jenkins, Bash, Python, Ansible
Data & Observability	Grafana, ELK, Clickhouse, InfluxDB, Prometheus, Redis, PostgreSQL, MongoDB
Security & Networking	ISO-Compliance, SSO, IAP, Wireguard, Nginx, Traefik, VPC Peering
Development	TypeScript, JavaScript, Java, C++, Next.js, AngularJS, Node.js

| EDUCATION & HONORS

BSc Software Engineering - Dept. of Informatics & Telecommunications, Athens

- 2nd Place, Crowdhackathon Insurance 2.0
- 4th Place, Smartcity Challenge
